

C4RWC Mission

Promote stewardship, conservation, enjoyment, and restoration of the rivers, ecosystems and wildlife habitats of the Chicopee-4 Rivers basin, while balancing and fostering river friendly city & town economies and community life.

We will accomplish this by:

1. Increasing awareness and appreciation of the rivers of the Chicopee basin through improved river access, education, and water quality monitoring
2. Advocate and encourage conservation of the rivers and their adjoining lands
3. Actively participate in long range planning for the rivers and lands along their banks through the support of land owners, various government agencies, public and private organizations
4. Encourage participation in the Council by holding regular meetings and sponsoring activities related to the rivers and tributaries
5. Promote and implement river and habitat restoration projects where possible
6. Support sustainable and river friendly community projects and land use
